

Data Entry Form Feedback

Ask your test user what they think about your form:	What the test user said:
What do you like about my form?	1. Nicely layed out.
	2. Good use of colour and space.
	3. Good logo.
Have I used a suitable font?	Yes because the question is bigger than the answer and it is the same font throughout.
Could I improve my title?	Make it colour but other than that it explains what the form is about.
Could I improve my labels?	The explain everything they should so not really.
Do I need to allow more space to type in the data?	The spaces are plenty big enough and leave enough room after someone has already typed something in the space available.
Can I improve the layout?	The layout is really good and I think that the layout is really good and easy to follow and the use of colour is very nice.
Are there any spelling errors?	No spelling errors.
Can I make the form easier to use?	The form I think couldn't be improved because the layout, the colour, logo, and the font is all very good and easy to follow and understand.
