

## **Prototyping and testing my gift bag**

I made a gift bag by hand which took a long time and I was glad I had finished it, it looked really good. Well I thought so.

I tested my gift bag at home by putting in a t-shirt to see if it would hold and not break and it was really good. So I tried two t-shirt and it didn't break which was amazing. The only thing that bothers me is that the gift bag is a bit too big for just one t-shirt.

I think that this covers prototyping and testing because I tried the product out and it worked.
