

## **Changes I made to my plan**

It was good that I revised my plan because I didn't put the right date in at the start, but now it is right and makes more sense. Also I added in the time for the half term so I don't get put behind.

I've moved my produce banner up in front of web graphics because I think it would be better if the banner was done before the web graphics because it is needed at the top of the page it would be better putting it on first than last. That's why I changed the order. I also added in "changes" these are the changes I make to the item I got feedback on. I also took off "ready made images" because I made all my own images and didn't use any ready made ones.
