

## Graphics Diary

### **26<sup>th</sup> April Tasks 2, 3 and 4**

I started on my plan and got that done really quite it was easy to do and I didn't have that many problems, but once I had done I went through it with my tutor and she helped me to put the right dates in and make sure that the half term also was not included.

I started on my monitoring this is the diary.

I've made the outline of my eportfolio, which took about an hour so it was good. I was pleased that I got it done that quickly.

### **27<sup>th</sup> April Tasks 7, 9,10 and 12**

Today I did some research on the Internet to see if I could get any ideas. I created some buttons for my eportfolio and they look really good and I'm going to put them on the eportfolio today.

I made my element table today and I started planning in my logo in rough. I'm going to take it home as well and see what else I can come up with.

### **10<sup>th</sup> May Task 13, 14 and 15**

I started my logo and I designed 4 in total and I chose the second one because it is better than the others. I started off thinking about what goes with the words "get set" and I came up with the theme on running and based my ideas around that. I enjoyed doing this because it was fun and very easy to do, it didn't take as long as I thought it would. I annotated my logo to show how I come up the idea, I also got a bit of feedback but I will need more.

### **11<sup>th</sup> May Tasks 15,15,17and 20**

I got more feedback from people in my group, and I made the changes that I needed to do.

I started on my medal in rough at home so it saved on time, then I put it onto the computer into Photodraw V2 then I went into Microsoft Visio to get the size of my medal and it was easy to make it 70 mm's. Because I only had a day to get it done I didn't really go for perfection just made it look good but if I

have time I think I'll go back and change it. I finished fit today, which was great because I'm on track with my project plan. I made 2 medal and choose the best one.

### **17<sup>th</sup> May Tasks 21, 22, 23, 26 and 27**

I annotated my medal so you can see how I came up with the idea of the medal.

I started collecting feedback for my medal because I need to make the changes as quick as possible because I needed to stay on track with my plan. I got it from a few people and it was really good to see what people said about it. I made the changes that I agreed on and I think it looks better.

I was working really fast today because I am on track and I am doing my t-shirt already. I did a rough design at home so it saved time again because I need all the time I can get. I made my t-shirt by drawing it by hand and then scanning it into the computer and worked on it in Photodraw and it looks really good. I'm going to make more designs and see which people like the best.

### **18<sup>th</sup> May Tasks 28, 29, 30 and 33**

I annotated my t-shirt and it was hard because I just thought of it but I didn't know how to put it into words but I did it to the best that I could do. I collected feedback on my 2 t-shirts and they liked both of them but the one they liked best I went with it, I had to make a few changes to the t-shirt which did look good once I finished. The changes took me about half an hour because I made changes but it just didn't look right but when I got it right I liked it.

I'm going to do the design of my gift bag at home because I think that I can think better on my own.

### **24<sup>th</sup> May Tasks 35, 36 and 37**

Today I started on my design of my gift bag. I'm a day behind but I think I can catch up. I started using Microsoft paint but it

was a bit hard so I copied what I had and put it into Microsoft PhotoDraw, and it was easier to do and I'm happy with the results. This was my 2d gift bag, but I want to get it done so 'm staying after college to carry on. I'm doing my 3D gift bag after college because I don't want to be behind with my project plan. I'm doing really well and I've got both of them done and I'm doing my net drawing in Microsoft Visio and I am adding in the measurements in this application.

I had annotated my gift bag so it will show how I came up with this idea of the gift bag.

I also got a bit of feedback and I have to type them up next time and write up the changes I made.

### **25<sup>th</sup> May Tasks 37, 41, 42, 42 and 44**

I started the day off by writing up my feedback and the changes I made.

I design my banner at home so I saved time on this. I created my banner in Microsoft Paint and it looks good but a bit fuzzy I think it looks affective like that. I also annotated it in word on how I came up with the idea of the design. I printed off the image and asked for feedback it was much quicker this way. From my feedback I got it was really good and there was no changes that I had to make so this made my life a lot easier and saved time.

### **7<sup>th</sup> May Tasks 47, 48, 49, 50 and 53**

I got all my information ready on Microsoft word so I could copy and paste it into Dreamweaver. I also took 3 photographs and edited them at college in the morning it was easy to do because I took all the background off by using Microsoft Paint then put them into Microsoft Photodraw to animate them. I got everything ready so I could get feedback off of people in my group. I got made the changes that I agreed with and it looks better, but there were only 2 changes I made. I tested all the web page and the links and they all work. I even had time to make my eportfolio look better.

**8<sup>th</sup> May Tasks 53, 54, 55, 56 and 58**

I'm going through my eportfolio and checking that everything is on the pages that needs to be on there, I have to check that all the links worked to the evidence, it looks good and all I have left to do is my review and I've finished everything which is good and I'm ok task with my project plan.
