

## Annotation of the banner

The banner shape is off of word. It looks really good and I think that it is suitable for children 9 – 13.

The logo was easy to do I went into paint and flipped it and put it onto the banner. So it took no time at all really.

The way I came up with this banner was thinking of what children that age like so I thought about the colour and then what could go on it then I thought that my logo could go on both sides of the text. Also about the style of the text so I thought if I did it a bit funky it would be something they liked.

I had a hard time trying to think of what colour to do the banner because I wanted it to be suitable for boys and girls so I thought it would look good if it was a yellow colour or a gold colour.

On the banner I used the logo twice and it is affective, when its been flipped. I really like the idea of this I didn't have it there at first I left it plain but it really didn't look right so I added a second logo and it looks better than it did. I really like the way that the text of boxing is big and red it makes it stand out, and it catch the eye and that's what I was going for.

The over all look of the banner is good and I do think that it will be good for children 9 – 13 because it is colourful.
